

Team 2 April Newsletter

As we begin April, we look forward to some enjoyable and educational field trips in Team 2. On April 2, students will go to Sun Valley Lanes to enjoy bowling and a “behind the scenes” look at the machinery that keeps the fun going. We have learned that the bowling alley is one of many businesses in our community that people go to for recreation and entertainment. Team 2 has been working on the skills of bowling in P.E. and this is a great way to show what we’ve learned!

On April 24, Team 2 students will be headed to Pioneers Park Nature Center to view some of the new life cycles that are beginning this spring. Last fall we studied the life cycle of a plant and a butterfly. We will review that information by going on guided tours with naturalists who will show us some exciting new growth at the Nature Center. This is also a great place to visit during the summer months when you need a day out and students will notice how things have changed in just a short time.

We are also continuing our family theme in Team 2 by presenting our family projects that show many similarities and differences that all families have. The children are very excited to share and enjoy telling the class all about what they do in their family. We will also begin learning about a popular author, Tomie DePaola, and the many books that he writes about families and their adventures.

We are beginning our last quarter of school and the weather will be getting much nicer and the days will be longer. As with any time during the school year, we will be focused on learning through the final day. Team 2 teachers want to thank you for the productive parent/teacher conferences in March and encourage you to call anytime you have questions or concerns.
