

Team 2 October News

Can you believe we are in the middle of our sixth week of school? Second grade is in full swing and the students are doing a nice job of understanding the new routines of a new grade. During the first week of school in September we started the very exciting theme of Life Cycles. We are learning about the life cycle of a butterfly and a plant. Second grade students will be able to see how a caterpillar undergoes metamorphosis and changes into a butterfly. The most exciting moment will come near the beginning of October when the butterflies emerge and we release them in the Butterfly Garden.

Beginning in October we will shift our focus to learning about different types of communities; rural, urban, and suburban. Students will learn what is in each community and the opportunities that each community presents its residents. The last week of the first quarter we will be focusing on having a healthy, drug free lifestyle. This will also be Red Ribbon Week and we will recite a drug-free pledge. Many activities will be planned this week throughout the school to remind children to live a healthy lifestyle.

Parent/teacher conferences are October 16th and 20th. Many parents signed up for a conference time at curriculum night. You should have received a call or e-mail from your child's reading teacher about a conference time if you did not attend curriculum night.
